

# RESILIENT TERRITORIES, RESILIENT COMMUNITIES

## Padiglione Italia. Biennale Architettura 2021

7<sup>th</sup> July 2021 | 12:00 am-4:00 pm\* Italian Time

The Conference “Resilient Territories, Resilient Communities” aims to highlight the very close bond that is generated between man and his territory and how the communities themselves react to calamitous events. The places, which are modified by ruinous phenomena, become fragile places, but at the same time rich of the energy from their inhabitants, whose sense of belonging acts as a stimulus, beyond the tragedy, to an organized and constructive reaction to the post-disaster.

A dynamic phenomenon that leads to a new social and territorial identity, as a consequence of a changing evolutionary development, able to rebuild urban and economic, social and cultural tissues.

The Firespill Project – Interreg Italy-Croatia, the After the Damages International Academy, the Agency for Reconstruction after the Emilia’s Earthquake of 2012 and the Clust-ER Build are actively engaged in providing a constant and active interdisciplinary support in scientific and technical dissemination for a more conscious interventional methodology.

Event realized within the Padiglione Italia  
at 17. Mostra Internazionale di Architettura della Biennale di Venezia

\*The time of the event has undergone a change due to disposition for G20 Venice
